

The Federal Communications Commission

Dear The Federal Communications Commission,

I object to paying ever more for my telephone service! And I strongly object to cost shifting onto individual consumers from the broader telecom industry.

I urge you to REJECT a flat fee proposal that would change how contributions are made to the Universal Service Fund.

The flat fee proposal you are considering is unfair to consumers as people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,

Michael Dean
